### Veterinary health certificate for the exportation of processed pet food including, canned pet food to Canada

<b>Part I: Details of dispatched consignment</b>	I.1. Consignor: Name:		I.2. Certificate reference number*:			
	Address:		I.3.a. Central competent authority: <b>Federal Food Safety and Veterinary Office FSVO</b>			
			I.3.b. Cantonal competent authority:			
	I.4. Consignee Name:		I.5. Country of origin: <b>Switzerland</b> ISO Code: <b>CH</b>			
	Address:		I.6. Country of destination: Canada ISO Code: CA			
			I.7. Zone or compartment of destination <sup>(1)</sup> :			
	I.8. Place of origin: Name:		I.9. Place of loading:			
	Address:		I.10. Date of departure:			
	Approval number of establishment(s):		I.11. Expected border post:			
	I.12. Means of transport: Aeroplane <input type="checkbox"/> Ship <input type="checkbox"/> Railway wagon <input type="checkbox"/> Road vehicle <input type="checkbox"/> Other <input type="checkbox"/> Identification: Documentation references:		I.13. Temperature of the product: Ambient <input type="checkbox"/> Chilled <input type="checkbox"/> Frozen <input type="checkbox"/>			
I.15. Commodities intended for use as: Pet food <input type="checkbox"/>		I.14. Identification of container/seal number <sup>(1)</sup> :				
		I.16. Total quantity:				
		I.17. Total number of packages:				
I.18. Identification of the commodities <sup>(2)</sup> :						
Nature of Commodity (HS code)	Name of the product	Treatment type	Lot ID/ Date code	Type of packaging	Number of packages	Date of production

<sup>(1)</sup> If applicable

<sup>(2)</sup> If necessary, extra tables can be attached as annex by the consignor and should be approved and stamped by the Cantonal Competent Authority

II. Sanitary information	Certificate reference number*:
Part II: Sanitary information	<p>I, the undersigned official veterinarian of the country of origin, confirm that the processed pet food and pet treats described above meet all the conditions laid down in the health attestation below:</p> <ol style="list-style-type: none"> <li>1. The finished processed pet food and pet treats as described in the veterinary export certificate have been prepared and stored in a plant approved and supervised by the competent veterinary authority of Switzerland.</li> <li>2. All unprocessed animal- origin products and/ or by-products for the finished processed pet foods and pet treats, including canned or hermetically sealed pet foods, originate only from:<sup>(1)</sup> <ul style="list-style-type: none"> <li><input type="checkbox"/> Either mammalian and/or avian terrestrial animals, including farmed game animals killed for human consumption, that received and passed ante-mortem inspection and were presented for post-mortem inspection in a slaughter facility under the supervision of the competent veterinary authority of Switzerland,</li> <li><input type="checkbox"/> and/ or non-mammalian aquatic animals showing no signs of disease communicable to humans or animals,</li> <li><input type="checkbox"/> and/ or invertebrates other than species pathogenic to humans or animals,</li> <li><input type="checkbox"/> and/ or raw materials derived from the above animals not presenting risks to public or animal health,</li> <li><input type="checkbox"/> and/ or dairy, hatchery products, eggs and egg products originating from animals which did not show any clinical signs of disease communicable through that material to humans or animals.</li> </ul> </li> <li>3. None of the animals from which any of the unprocessed or processed animal-origin products and/or by-products used to manufacture the processed pet food are derived were under any official restrictions by the member state competent veterinary authority for any serious epizootic disease to which the species from which the product or by-product was derived is susceptible and can be transmitted by the untreated product or by-product and none of the animals from which the animal origin raw materials are derived were under movement restrictions for or were culled or eradicated as part of a disease response for any reportable disease as defined by Canada<sup>(2)</sup>.</li> <li>4. All processed and unprocessed bovine-origin products and/or by-products used in the manufacture of processed pet food, excluding milk or milk products:<sup>(1)</sup> <ul style="list-style-type: none"> <li><input type="checkbox"/> Either Are derived only from animals whose origin is from Australia, New Zealand, EU and Switzerland recognized by Canada as being of Negligible BSE Risk Status (as described by the WOA<sup>H</sup>)<sup>(2)</sup>,</li> <li><input type="checkbox"/> and/ or Are derived from animals whose origin is from EU recognized by Canada as being of Controlled BSE Risk Status (as described by the WOA<sup>H</sup>)<sup>(2)</sup></li> </ul> <p>And:</p> <ul style="list-style-type: none"> <li>4.1.1. are not derived from, do not contain, and have not been cross-contaminated with Specified Risk Material from bovine animals including: the palatine tonsils and distal ileum from bovine animals of all ages and the skull, brain, trigeminal ganglia, eyes, spinal cord and vertebral column (excluding the vertebrae of the tail, the transverse processes of the thoracic and lumbar vertebrae and the wings of the sacrum), from bovine animals aged 30 months and older and</li> <li>4.1.2. do not include any mechanically separated meat and</li> <li>4.1.3. every precaution was taken to prevent direct or indirect contact during the slaughter, processing and handling of the bovine origin ingredients with the aforementioned SRM tissues in point 4.1.1.</li> <li>4.2. are sourced from animals that were presented live for slaughter and were not subjected to a stunning process, prior to slaughter, with a device injecting compressed air or gas into the cranial cavity, or to a pithing process, and were humanely rendered unconscious prior to being bled or were slaughtered as per Judaic or Islamic law.</li> <li>4.3. Rendered fats used in the pet food and/or pet treats have a maximum insoluble impurities level of 0.15% in weight.</li> </ul> </li> <li>5. Either the processed pet food and pet treats or the raw materials being used and excluding canned or hermetically sealed pet foods, have been subjected to a heat treatment:<sup>(1)</sup> <ul style="list-style-type: none"> <li><input type="checkbox"/> Either at least 90 degrees Celsius throughout their substance</li> <li><input type="checkbox"/> or to 70 degrees Celsius for 30 minutes</li> <li><input type="checkbox"/> or for milk products, 75 degrees Celsius for 15 seconds</li> <li><input type="checkbox"/> or The processed pet food and treats for export to Canada have been sufficiently heat treated to reach the microbiological standards as outlined in point 6.</li> </ul> </li> <li>6. The processed pet food and treats, excluding pet foods that have been canned or heat treated in hermetically sealed containers, have been analysed by random sampling of at least five (5) samples taken during or after storage at the processing plant and complied with the following standards: on a basis of at least five (5) samples for each lot<sup>(3)</sup> processed, selected at random during or after storage at the processing plant, and meeting the following standards: Salmonella: Absence in 25g: n=5, c=0, m=0, M=0 and Enterobacteriaceae: n=5, c=2, m=10, M=300 in 1g.</li> </ol>

\* Indicated by the cantonal competent authority.

<b>II. Sanitary information</b>	Certificate reference number*:
<p>Where:</p> <p>n = number of samples to be tested. For every individual lot or batch (not shipment), 5 samples must be tested.</p> <p>m = threshold value for the number of bacteria; the result is considered satisfactory if the number of bacteria in all samples does not exceed m;</p> <p>M = maximum value for the number of bacteria; the result is considered unsatisfactory if the number of bacteria in one or more samples is M or more</p> <p>c = number of samples the bacterial count of which may be between m and M, the sample still being considered acceptable if the bacterial count of the other samples is m or less</p> <p>The lot or batch number(s) of the products to be exported must appear on both the certificate of analysis and at least one of the following:</p> <ul style="list-style-type: none"> <li>• the shipping invoice,</li> <li>• a copy of label or ingredients list</li> <li>• the product description on single window for electronic declaration.</li> </ul> <p>7. Processed pet foods that have been canned or heat treated in hermetically sealed containers:</p> <p>7.1. have been heat treated to a minimum F0 value of greater than or equal to 3.0 and</p> <p>7.2. have been analysed by a random sampling of at least five containers from each processed batch by laboratory diagnostic methods to ensure adequate heat treatment of the whole consignment to meet condition in the point 7.1.</p> <p>8. Every precaution was taken to prevent cross-contamination of the finished products with any animal origin product or by-product derived from animals of a lesser zoosanitary status.</p> <p>9. Have been packaged in new packaging that clearly indicates that the product is intended for pet food.</p> <p><sup>(1)</sup> Tick as appropriate</p> <p><sup>(2)</sup> The list of diseases that are reportable in Canada can be found on the Canadian Food Inspection Agency (CFIA) website: <a href="#">Animal Health Status By Disease – Animals</a>. The CFIA accepts the WOAHA classification of BSE Risk Status: <a href="#">List of the BSE risk Status</a>.</p> <p><sup>(3)</sup> Lot or batch means a single production run, at a single facility, using the same ingredients and procedure, over a period not exceeding 24 hours.</p>
