Veterinary health certificate for the exportation of manufactured animal feed and pet animals feed to the United Arab Emirates

Part I: Details of dispatched consignment	I.1. Consignor: Name:		I.2. Certificate reference number*:			
	Address:		I.3.a. Central competent authority: Federal Food Safety and Veterinary Office FSVO			
			I.3.b. Cantonal competent authority:			
			I.3.c. MOCCAIE Import Permit No:			
	I.4. Consignee Name:		I.5. Country of origin: Switzerland ISO Code: CH			
	Address:		I.6. Country of destination: United Arab Emirates ISO Code: AE			
			I.7. Zone or compartment of destination:			
	I.8. Place of origin: Name:		I.9. Place of loading:			
	Address:		I.10. Date of departure:			
	Approval number of establishment(s):		I.11. Expected border post:			
I.12. Means of transport: Aeroplane <input type="checkbox"/> Ship <input type="checkbox"/> Railway wagon <input type="checkbox"/> Road vehicle <input type="checkbox"/> Other <input type="checkbox"/> Identification: Documentation references:		I.13. Temperature of the product: Ambient <input type="checkbox"/> Chilled <input type="checkbox"/> Frozen <input type="checkbox"/>				
I.15. Commodities intended for use as: Manufactured animal feed <input type="checkbox"/> Pet food only <input type="checkbox"/>		I.14. Identification of container/seal number:				
		I.16. Description of the products:				
		I.17. Total number of packages:				
I.18. Identification of consignment ⁽¹⁾ :						
Type of animal protein	Animal species	Animal source material	Country of origin	Type of packaging	Number of packages	Net weight

⁽¹⁾ If necessary, extra tables can be attached as annex by the consignor and should be approved and stamped by the Cantonal Competent Authority

Switzerland	Manufactured animal feed and Pet animals feed
II. Sanitary information	Certificate reference number*:
Part II: Sanitary information	<p>I, the undersigned certifying officer, confirm that:</p> <ol style="list-style-type: none"> a) The product was manufactured in an establishment supervised by the competent authority. b) The products are safe and suitable for animal consumption only. c) These feeds are manufactured according to good manufacturing requirements. Feed is produced in compliance with GMP and is free from any physical, chemical or biological contaminants that are prohibited internationally. d) The product does not contain any radiation substances. No irradiation takes place of the product after manufacture and prior to shipping. e) The products are from animals that were not killed as part of the eradication program of epidemic and infectious diseases. f) Animal byproducts and processed products must be collected and transported in sealed new packaging or covered leak-proof containers or vehicles. They meet the hygienic sanitary requirements established by the Competent Authority of country of origin and the vehicle or transport equipment is in proper conditions of hygiene and maintenance. g) There was no contamination of the product with any sort of notifiable avian influenza virus during processing and transportation. The conditions of handling, loading and transportation follow Good Manufacturing Practices procedures, in order to avoid the contact of the products with any potential source of contamination. h) The maximum permissible limits for heavy metals in animal feed comply with the updated standards of the European Union (EU). i) The maximum permissible levels of aflatoxin in products intended for animal feed comply with the maximum content in mg/kg (ppm): Feed materials: 0.02 Complementary feeding stuff: 0.02. j) For products intended for animal feeding in the category of dog and cat feed (aflatoxin B1): maximum limit of 10 µg/kg (0.01 mg/kg). k) Any meat and meat derivatives used in the manufacture of the product were taken from animals that were examined before and after slaughter. l) The product: <ul style="list-style-type: none"> <input type="checkbox"/> either (i) was not made using poultry meat or poultry meat derivatives; <input type="checkbox"/> or (ii) was made using poultry meat or poultry meat derivatives, and the product was manufactured in a country or region free of highly pathogenic avian influenza; <input type="checkbox"/> or (iii) was made using poultry meat or poultry meat derivatives that have been heated at 70°C for at least 30 minutes or subject to an alternative treatment with an equivalent effect on the avian influenza virus. m) The product: <ul style="list-style-type: none"> <input type="checkbox"/> either (i) was not made using beef or beef derivatives. <input type="checkbox"/> or (ii) was made using beef or beef derivatives (other than meat meal, bone meal and bloodmeal), and the product is not intended for feeding to ruminant animals, and the product was manufactured in a country with a negligible or controlled BSE risk. n) No meat meal, bone meal or bloodmeal obtained from ruminant animals was used in the manufacture of the product. o) The product described above was not made using any porcine derivatives. p) The product described above was not made using any Specified Risk Material, namely: <ul style="list-style-type: none"> (i) tonsils or distal ileum from cattle of any age originating in a country with a controlled or undetermined BSE risk; (ii) brains, eyes, spinal cord, skull or vertebral column from cattle aged over 30 months originating from a country with a controlled BSE risk; (iii) brains, eyes, spinal cord, skull or vertebral column from cattle aged over 12 months originating from a country with an undetermined BSE risk.
