

National Nutrition Survey menuCH 2014/15

Realised and planned analyses

Status: September 2022

Table of contents

1	Overview of peer-reviewed publications.....	2
2	Overview of planned analyses	6

The Swiss Federal Food Safety and Veterinary Office (FSVO) provides the anonymised individual data of the Swiss National Nutrition Survey "menuCH" 2014/2015 upon request also to external researchers for (non-commercial) scientific purposes (<https://menuch.unisante.ch/index.php/home>).

Below you will find an overview of already completed as well as planned analyses carried out by external institutions. The FSVO publications are not listed here. The order of peer-reviewed publications is arranged in reverse chronological order. The publications, as well as the planned analyses, are indicated in their original language. The responsible person refers to the person to whom the compliance with the data protection agreement is assigned.

1 Overview of peer-reviewed publications

Agreement no. - Institution	Person responsible	Publication title	Publication year
ID036 - Uni Zürich (UZH), Institut für Epidemiologie, Biostatistik und Prävention	Sabine Rohrmann	Different dietary assessment methods, similar conclusions? Comparison of a country's adherence to food-based dietary guidelines as depicted in two population-based surveys using different dietary assessment methods	2022
ID103 – Uni Zürich (UZH), Institut für Evolutionäre Medizin	Kaspar Staub	A quantitative synthesis study on body mass index and associated factors among adult men and women in Switzerland	2022
ID103 – Uni Zürich (UZH), Institut für Evolutionäre Medizin	Kaspar Staub	The role of body height as a co-factor of excess weight in Switzerland	2022
ID036 - Uni Zürich (UZH), Institut für Epidemiologie, Biostatistik und Prävention	Sabine Rohrmann	Investigation of Alcohol-Drinking Levels in the Swiss Population: Differences in Diet and Associations with Sociodemographic, Lifestyle and Anthropometric Factors	2022
ID036 - Uni Zürich (UZH), Institut für Epidemiologie, Biostatistik und Prävention	Sabine Rohrmann	Characterisation of meat consumption across socio-demographic, lifestyle and anthropometric groups in Switzerland: results from the National Nutrition Survey menuCH	2022
ID036 - Uni Zürich (UZH), Institut für Epidemiologie, Biostatistik und Prävention	Sabine Rohrmann	Does diet map with mortality? Association of dietary patterns with chronic disease mortality and its spatial dependence in Switzerland	2022
ID044 - Forschungsinstitut für biologischen Landbau (FiBL), Departement für Sozioökonomie	Christian Schader	Consumer strategies towards a more sustainable food system: insights from Switzerland	2022
ID103 – Uni Zürich (UZH), Institut für Evolutionäre Medizin	Kaspar Staub	Selling, buying and eating – a synthesis study on dietary patterns across language regions in Switzerland	2021

Agreement no. - Institution	Person responsible	Publication title	Publication year
ID109 - Haute école de santé de Genève (HEdS-Genève), filière nutrition et diététique	Angeline Chatelan	Diet quality in middle-aged and older women with and without body weight dissatisfaction: results from a population-based national nutrition survey in Switzerland	2021
ID037 - Berner Fachhochschule (BFH), Wirtschaft, Abteilung Methoden und Grundlagen	Farshideh Einsele	A Study about Discovery of Critical Food Consumption Patterns Linked with Lifestyle Diseases for Swiss Population using Data Mining Methods	2021
ID044 - Forschungsinstitut für biologischen Landbau (FiBL), Departement für Sozioökonomie	Christian Schader	How food choices link sociodemographic and lifestyle factors with sustainability impacts	2021
ID036 - Uni Zürich (UZH), Institut für Epidemiologie, Biostatistik und Prävention	Sabine Rohrmann	Ultraprocessed Food Consumption is Strongly and Dose-Dependently Associated with Excess Body Weight in Swiss Women	2021
ID037 - Berner Fachhochschule (BFH), Wirtschaft, Abteilung Methoden und Grundlagen	Farshideh Einsele	Building an Integrated Relational Database from Swiss Nutrition National Survey and Swiss Health Datasets for Data Mining Purposes	2021
ID043 – Uni Zürich (UZH), Institut für Evolutionäre Medizin	Kaspar Staub	Clash of the pandemics? At least 150'000 adults in Switzerland suffer from obesity grades 2 or 3 and are thus at elevated risk for severe COVID-19	2020
ID036 - Uni Zürich (UZH), Institut für Epidemiologie, Biostatistik und Prävention	Sabine Rohrmann	Daily and meal-based assessment of dairy and corresponding protein intake in Switzerland: results from the National Nutrition Survey menuCH	2020
ID035 – Uni Genève (UNIGE), Institut de recherches sociologiques	Marlyne Sahakian	Towards Win-Win Policies for Healthy and Sustainable Diets in Switzerland	2020

Agreement no. - Institution	Person responsible	Publication title	Publication year
ID036 - Uni Zürich (UZH), Institut für Epidemiologie, Biostatistik und Prävention	Sabine Rohrmann	No-meat eaters are less likely to be overweight or obese, but take dietary supplements more often: results from the Swiss National Nutrition survey menuCH	2020
