Health certificate for the exportation of bovine semen from Switzerland to Uganda

Part I: Details of dispatched consignment	I.1. Consignor Name: Address:		I.2. Certificate reference number*:			
			I.3. a. Central competent authority: Federal Food Safety and Veterinary Office FSVO			
			I.3. b. Cantonal competent authority:			
	I.4. Consignee Name: Address:					
	I.5. Country of origin: Switzerland ISO Code: CH		I.6. Country of destination: Uganda ISO Code: UG			
	I.7. Place of origin Name: Address:		I.8. Place of loading:			
	Approval number of establishment(s):		I.9. Temperature of product: Ambient <input type="checkbox"/> Chilled <input type="checkbox"/> Frozen <input type="checkbox"/>			
	I.10. Means of transport (if available): Aeroplane <input type="checkbox"/> Ship <input type="checkbox"/> Railway wagon <input type="checkbox"/> Road vehicle <input type="checkbox"/> Other <input type="checkbox"/>		I.11. Identification of container/seal number:			
	I.12. Commodities intended for use as: Breeding/rearing <input type="checkbox"/> Wildlife management <input type="checkbox"/> Other <input type="checkbox"/>			I.13. Total number of packages:		
	I.14. Identification of the semen ¹⁾ :					
	Name of the donor	Breed	Ear-tag No.	Date of birth	Date(s) of collection	Number of straws

1) If necessary, extra tables can be attached as annex by the consignor and should be approved and stamped by the cantonal competent authority.

Switzerland		Bovine Semen																														
II. Sanitary information		Certificate reference number*:																														
Part II: Sanitary information	The undersigned certifying officer confirms ...																															
	1. SWITZERLAND, the country of origin of the donor bull is officially free from tuberculosis, brucellosis, leucosis, IBR/IPV and Foot and Mouth Disease.																															
	2. The semen was collected from a bull maintained in an artificial insemination centre which is officially approved and under the supervision of an official veterinarian from the Cantonal Veterinary Authority.																															
	3. At the time of the collection of the semen, the donor bulls were healthy and free of evidence of contagious diseases.																															
	4. All the animals maintained in the artificial insemination centre, including the donor bull, are recognized to be free of tuberculosis, brucellosis, leptospirosis, paratuberculosis, enzootic bovine leucosis, campylobacteriosis and trichomoniasis.																															
	5. The donor bull has been subjected to the following tests with negative results ¹⁾ :																															
	<table border="1"> <tbody> <tr> <td>Tuberculosis</td> <td><input type="checkbox"/></td> <td>intradermal test</td> </tr> <tr> <td rowspan="2">Brucellosis</td> <td><input type="checkbox"/></td> <td>ELISA test</td> </tr> <tr> <td><input type="checkbox"/></td> <td>serum agglutination or complement fixation test</td> </tr> <tr> <td rowspan="2">Leucosis</td> <td><input type="checkbox"/></td> <td>agar gel immunodiffusion</td> </tr> <tr> <td><input type="checkbox"/></td> <td>ELISA</td> </tr> <tr> <td rowspan="2">IBR/IPV</td> <td><input type="checkbox"/></td> <td>ELISA</td> </tr> <tr> <td><input type="checkbox"/></td> <td>serum neutralisation test</td> </tr> <tr> <td>Trichomoniasis</td> <td><input type="checkbox"/></td> <td>direct microscopic examination and culture</td> </tr> <tr> <td>Campylobacteriosis</td> <td><input type="checkbox"/></td> <td>culture</td> </tr> <tr> <td rowspan="2">Leptospirosis</td> <td><input type="checkbox"/></td> <td>microagglutination lysis</td> </tr> <tr> <td><input type="checkbox"/></td> <td>treatment</td> </tr> </tbody> </table>			Tuberculosis	<input type="checkbox"/>	intradermal test	Brucellosis	<input type="checkbox"/>	ELISA test	<input type="checkbox"/>	serum agglutination or complement fixation test	Leucosis	<input type="checkbox"/>	agar gel immunodiffusion	<input type="checkbox"/>	ELISA	IBR/IPV	<input type="checkbox"/>	ELISA	<input type="checkbox"/>	serum neutralisation test	Trichomoniasis	<input type="checkbox"/>	direct microscopic examination and culture	Campylobacteriosis	<input type="checkbox"/>	culture	Leptospirosis	<input type="checkbox"/>	microagglutination lysis	<input type="checkbox"/>	treatment
	Tuberculosis	<input type="checkbox"/>	intradermal test																													
	Brucellosis	<input type="checkbox"/>	ELISA test																													
		<input type="checkbox"/>	serum agglutination or complement fixation test																													
Leucosis	<input type="checkbox"/>	agar gel immunodiffusion																														
	<input type="checkbox"/>	ELISA																														
IBR/IPV	<input type="checkbox"/>	ELISA																														
	<input type="checkbox"/>	serum neutralisation test																														
Trichomoniasis	<input type="checkbox"/>	direct microscopic examination and culture																														
Campylobacteriosis	<input type="checkbox"/>	culture																														
Leptospirosis	<input type="checkbox"/>	microagglutination lysis																														
	<input type="checkbox"/>	treatment																														
6. The donor bull has been clinically free of Johne's disease at the entry and during the stay at the semen production center.																																
7. Semen obtained in compliance with Annex II , Part 5, Chapter II, of Commission Delegated Regulation (EU) No 2020/686.
