### Veterinary certificate for the exportation of animal intestines to Georgia

<b>Part I: Details of dispatched consignment</b>	I.1. Consignor: Name: Address:		I.2. Certificate reference number*:				
			I.3. a. Central competent authority: <b>Federal Food Safety and Veterinary Office FSVO</b>				
			I.3. b. Cantonal competent authority:				
	I.4. Consignee Name: Address:						
	I.5. Country of origin: <b>Switzerland</b> ISO Code: <b>CH</b>			I.6. Country of destination: <b>Georgia</b> ISO Code: <b>GE</b>			
	I.7. Place of origin: Name: Address:  Approval number of establishment(s) <sup>1)</sup> :			I.8. Place of loading:			
				I.9. Expected border post <sup>1)</sup> :			
	I.10. Means of transport (if available): Aeroplane <input type="checkbox"/> Ship <input type="checkbox"/> Railway wagon <input type="checkbox"/> Road vehicle <input type="checkbox"/> Other <input type="checkbox"/> Identification <sup>1)</sup> :			I.11. Temperature of product: Ambient <input type="checkbox"/> Chilled <input type="checkbox"/> Frozen <input type="checkbox"/>			
				I.12. Identification of container/seal number <sup>1)</sup> :			
	I.13. Commodities intended for use as: Human consumption <input type="checkbox"/>				I.14. Total number of packages:		
	I.15. For import or admission into Georgia <sup>2)</sup> :						
	Species (scientific name) <sup>1)</sup> :		Treatment type:	Origin:	Net weight (kg):	Number of packages	Type of packaging:

1) If applicable

2) If necessary, extra tables can be attached as annex by the consignor and should be approved and stamped by the Cantonal Competent Authority.

Switzerland	Animal intestines
II. Sanitary information	Certificate reference number*:
Part II: Sanitary information	<p>II.1. Animal Health attestation</p> <p>The undersigned certifying officer confirms, that the animal casings described above:</p> <ul style="list-style-type: none"> <li>a) come from plants approved by the competent authority;</li> <li>(1) b) have been cleaned, scraped and: <ul style="list-style-type: none"> <li>(2) either salted with NaCl for 30 days</li> <li>(2) or bleached</li> <li>(2) or dried after scraping</li> </ul> </li> <li>c) have undergone all precautions to avoid recontamination after treatment.</li> </ul> <p>II.2. Public Health Attestation</p> <p>II.2.1. If containing material from bovine, ovine or caprine animals, the intestines used in the preparation of casings shall be subject to the following conditions depending on the BSE risk category of the country of origin:</p> <ul style="list-style-type: none"> <li>(2) II.2.1.1. For imports from a country or a region with a negligible BSE risk as listed in Annex to Commission Decision 2007/453/EC as amended: <ul style="list-style-type: none"> <li>1. the country or region is classified in accordance with Decision 2007/453/EC as a country or region posing a negligible BSE risk;</li> <li>2. the animals from which the products of bovine, ovine and caprine animal origin were derived passed ante mortem and post mortem inspections;</li> <li>(2)(3) 3. the products of bovine, ovine and caprine animal origin do not contain and are not derived from specified risk material as defined in point 1 of Annex V to this Regulation (EC) No 999/2001;</li> <li>(2) 4. the products of bovine, ovine and caprine animal origin do not contain and are not derived from mechanically separated meat obtained from bones of bovine, ovine or caprine animals, except if the animals, from which the products of bovine, ovine and caprine animal origin are derived, were born, continuously reared and slaughtered in a country or region classified in accordance with Decision 2007/453/EC as a country or region posing a negligible BSE risk in which there has been no BSE indigenous cases;</li> <li>(2) 5. the animals from which the products of bovine, ovine and caprine animal origin were derived have not been slaughtered after stunning by means of gas injected into the cranial cavity or killed by the same method or slaughtered by laceration after stunning of central nervous tissue by means of an elongated rod-shaped instrument introduced into the cranial cavity, except if the animals from which the products of bovine, ovine and caprine animal origin are derived, were born continuously reared and slaughtered in a country or region classified in accordance with Decision 2007/453/EC as a country or region posing a negligible BSE risk;</li> <li>(2) 6. if the animals, from which the products of bovine, ovine and caprine animal origin were derived, originate from a country or region classified in accordance with Decision 2007/453/EC as a country or region posing an undetermined BSE risk, the animals have not been fed with meat-and-bone meal or greaves, as defined in the OIE Terrestrial Animal Health Code;</li> <li>(2) 7. if the animals, from which the products of bovine, ovine and caprine animal origin were derived, originate from a country or region classified in accordance with Decision 2007/453/EC as a country or region posing an undetermined BSE risk, the products were produced and handled in a manner which ensures that they did not contain and were not contaminated with nervous and lymphatic tissues exposed during the deboning process.</li> </ul> </li> <li>(2) II.2.1.2. For imports from a country or a region with a controlled BSE risk as listed in Annex to Commission Decision 2007/453/EC as amended: <ul style="list-style-type: none"> <li>1. the country or region is classified in accordance with Decision 2007/453/EC as a country or region posing controlled BSE risk;</li> <li>2. the animals from which the products of bovine, ovine and caprine animal origin were derived passed ante mortem and post mortem inspections;</li> <li>3. the animals from which the products of bovine, ovine and caprine animal origin destined for export were derived have not been killed, after stunning, by laceration of central nervous tissue by means of an elongated rod-shaped instrument introduced into the cranial cavity, or by means of gas injected into the cranial cavity;</li> <li>(2)(3) 4. the products of bovine, ovine and caprine animal origin do not contain and are not derived from specified risk material as defined in point 1 of Annex V to Regulation (EC) No 999/2001, or mechanically separated meat obtained from bones of bovine, ovine or caprine animals.</li> <li>(2)(4) 5. In the case of intestines originally sourced from a country or a region with a negligible BSE risk, imports or treated intestines shall be subject to the following conditions: <ul style="list-style-type: none"> <li>a) the country or region is classified in accordance with Decision 2007/453/EC as a country or region posing a controlled BSE risk;</li> <li>b) the animals from which the products of bovine, ovine and caprine animal origin were derived were born, continuously reared and slaughtered in the country or region with a negligible BSE risk and passed ante mortem and post mortem inspections;</li> <li>(2) c) if the intestines are sourced from a country or region where there have been BSE indigenous cases: <ul style="list-style-type: none"> <li>(2) (i) the animals were born after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants has been enforced; or</li> <li>(2) (ii) the products of bovine, ovine and caprine animal origin do not contain and are not derived from specified risk material as defined in point 1 of Annex V to Regulation (EC) No 999/2001.</li> </ul> </li> </ul> </li> </ul> </li> </ul>

\* Indicated by the Cantonal competent authority.

Switzerland	Animal intestines
<b>II. Sanitary information</b>	Certificate reference number*:
<p>(2) II.2.1.3. For imports from a country or a region with an undetermined BSE risk as listed in Annex to Commission Decision 2007/453/EC:</p> <ol style="list-style-type: none"> <li>1. the animals from which the products of bovine, ovine and caprine animal origin were derived have not been fed meat-and-bone meal or greaves derived from ruminants, as defined in the OIE Terrestrial Animal Health Code, and passed ante mortem and post mortem inspections;</li> <li>2. the animals from which the products of bovine, ovine and caprine animal origin were derived have not been killed, after stunning, by laceration of central nervous tissue by means of an elongated rod-shaped instrument introduced into the cranial cavity, or by means of gas injected into the cranial cavity;</li> </ol> <p>(2) 3. the products of bovine, ovine and caprine animal origin do not contain and are not derived from:</p> <ol style="list-style-type: none"> <li>i. specified risk material as defined in point 1 of Annex V to Regulation (EC) No 999/2001;</li> <li>ii. nervous and lymphatic tissues exposed during the deboning process;</li> <li>iii. mechanically separated meat obtained from bones of bovine, ovine or caprine animals.</li> </ol> <p>(2)(4) 4. In the case of intestines originally sourced from a country or a region with a negligible BSE risk, imports of treated intestines shall be subject to the following conditions:</p> <ol style="list-style-type: none"> <li>a) the country or region is classified in accordance with Decision 2007/453/EC as a country or region posing an undetermined BSE risk;</li> <li>b) the animals from which the products of bovine, ovine and caprine animal origin were derived were born, continuously reared and slaughtered in the country or region with a negligible BSE risk and passed ante mortem and post mortem inspections;</li> <li>(2) c) if the intestines are sourced from a country or region where there have been BSE indigenous cases: <ol style="list-style-type: none"> <li>(2) (i) the animals were born after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants had been enforced; or</li> <li>(2) (ii) the products of bovine, ovine and caprine animal origin do not contain and are not derived from specified risk material as defined in point 1 of Annex V to Regulation (EC) No 999/2001.</li> </ol> </li> </ol> <p>Notes: Part I Box reference Registration number (railway wagons or container and lorries), flight number (aircraft) or name (ship). Separate information is to be provided in the event of unloading and reloading. I.12: Part II</p> <ol style="list-style-type: none"> <li>1) Treatment that has been applied from the options listed in the Animal Health attestation in Section 1b.</li> <li>2) Keep as appropriate.</li> <li>3) The removal of specified risk material is not required if the products of bovine, ovine and caprine animal origin derive from animals born, continuously reared and slaughtered in a third country or region of a third country classified in accordance with Decision 2007/453/EC as posing a negligible BSE risk.</li> <li>4) Only applicable to imports of treated intestines.</li> </ol> <p>The colour of the signature shall be different to that of the printing. The same rule applies to the stamp other than those embossed or watermarked.</p>
