Veterinary certificate for the exportation of bovine semen from Switzerland to Georgia

Part I: Details of dispatched consignment	I.1. Consignor: Name: Address:		I.2. Certificate reference number*:		
			I.3. a. Central competent authority: Federal Food Safety and Veterinary Office FSVO		
			I.3. b. Cantonal competent authority:		
	I.4. Consignee Name: Address:				
	I.5. Country of origin: Switzerland ISO Code: CH		I.6. Country of destination: Georgia ISO Code: GE		
	I.7. Place of origin: Name: Address: Approval number of establishment(s) :		I.8. Place of loading:		
	I.9. Means of transport (if available): Aeroplane <input type="checkbox"/> Ship <input type="checkbox"/> Railway wagon <input type="checkbox"/> Road vehicle <input type="checkbox"/> Other <input type="checkbox"/>		I.10. Temperature of product: Ambient <input type="checkbox"/> Chilled <input type="checkbox"/> Frozen <input type="checkbox"/>		
			I.11. Identification of container/seal number:		
	I.12. Commodities intended for use as: Breeding/rearing <input type="checkbox"/> Wildlife management <input type="checkbox"/> Other <input type="checkbox"/>			I.13. Total number of packages:	
	I.14. Identification of the semen ¹⁾ :				
	Name of the donor	Breed	Ear-tag No	Date(s) of collection	Number of straws
					Total number of straws

1) If necessary, extra tables can be attached as annex by the consignor and should be approved and stamped by the cantonal competent authority.

Switzerland		Bovine Semen	
II. Sanitary information		Certificate reference number*:	
Part II: Sanitary information	The undersigned official Veterinarian confirms ...		
	<ol style="list-style-type: none"> 1. The semen was: <ol style="list-style-type: none"> 1.1 collected from a donor bull which has been tested immediately preceding entry into the semen production centre and confirmed to be negative for tuberculosis, brucellosis, leptospirosis, enzootic bovine leucosis, bluetongue, trichomoniasis and campylobacteriosis; and 1.2 collected from a donor bull which has been resident at least thirty (30) days at a semen production centre which is officially approved and supervised by the Competent Authority; and 1.3 processed and continuously stored at an approved semen production centre in compliance with international zoosanitary norms. 2. The donor bull is maintained in semen collection centre where natural service is not authorized and was healthy at the time of collection of the semen. 3. All animals maintained at the semen production centre, including the donor bull, are recognized to be free of tuberculosis, brucellosis, leptospirosis, enzootic bovine leucosis, bluetongue, trichomoniasis, campylobacteriosis and bovine virus diarrhoea based on regularly scheduled testing performed at the centre on the following basis: <ol style="list-style-type: none"> 3.1 at intervals of twelve (12) months they are tested for brucellosis, leptospirosis, campylobacteriosis, trichomoniasis, tuberculosis and enzootic bovine leucosis; 3.2 within six months after semen collection, paratuberculosis; 3.3 all the donor bulls comply with the conditions regarding bluetongue, laid down in Annex II , Part 5, Chapter II, of Commission Delegated Regulation (EU) No 2020/686 3.4 all animals resident in the semen production centre are officially free of bovine virus diarrhoea based on testing by using a virus isolation test or an Antigen ELISA test or a PCR test with negative results after having attained six (6) months of age and following their entry into the pre-entry isolation facility of the centre. 4. The semen has been stored under approved conditions for a minimum of thirty (30) days post collection and during this period, the donor bull has remained free of evidence of infectious or contagious disease. 5. Antibiotics have been added to the semen in accordance with internationally accepted standards. 6. Switzerland is recognized to be free of foot and mouth disease, rinderpest, contagious bovine pleuropneumonia, lumpy skin disease, Rift Valley fever and Epizootic haemorrhagic disease
