

## ANIMAL HEALTH CERTIFICATE FOR IMPORT OF PET FOODS INTO INDIA

### I. CERTIFICATION FOR :

1. Consignor (name and address in full)	2. Health certificate No : _____ Date : _____
3. Consignee (name and address in full)	4. Country of origin <b>SWITZERLAND</b>
5. Competent Authority 5.1 Ministry: 5.2 Department:	6. Place of loading :
7 Quantity (in word and figures) : 7.1 Number of packs : 7.2 Net weight:	8. Consignment identification details (Batch number of the product/s) <b>Lot No.</b>
9. Address of pet food manufacturing plant:	10.1 Place of destination: 10.2 Final destination (name and address In full)
11. Registration/Accreditation number(s) of the manufacturing plant  (Number/Date/Validity)	12. Mode of Transport :
13. Name and address of Registration/ Accreditation authority	

*N.B.*

- (a). a separate certificate must be provided for each consignment of pet foods transported in the same aircraft, railway wagon, lorry or ship and consigned to the same destination.
- (b). The original of the certificate must accompany the consignment until it reaches the border inspection post.
- (c). It must be completed on the day of loading and all time limits referred to relate to that date.
- (d). The consignment will not be permitted entry into the India in the vent of a consignment arriving in the country either in an unsealed container or in a container the seal of which has been broken or with evidence of contamination en rout with risk material or with inadequate certification.

II. The undersigned certifies that :

1. The pet food described above originates from the meat/meat products of clinically healthy animals:
2. The pet food described above originates from the meat/meat products of animals which have undergone ante-mortem and post-mortem examinations:
3. The pet food is produced from poultry and pigs in an establishment which is set outside a 25km radius of areas with restrictive measures concerning notifiable Avian Influenza.
4. The pet food described above does not contain any ingredient of ruminant origin,  
\*except milk/milk products,  
\*except protein free tallow of ovine or caprine origin,  
\*except ovine material which was legally imported exclusively from New Zealand a country with a negligible BSE-risk according with EC-legislation.
5. The certified materials or the animal origin components of the product have been processed in a manner to have attained a core temperature not less than 70°C for 30 minutes,
6. The pet food is regularly inspected by the competent authorities and is regularly analyzed by a random sampling of at least five samples from each processed batch taken during or after storage at the processing plant, that complies with the following standards :  
Salmonella: absence in 25g: n=5, c=0, m=0, M=0,  
Enterobacteriaceae n=5, c=2, m=10, M=300cfu/g  
where  
n=number of units comprising the sample,  
m=threshold value for the number of bacteria – the result is satisfactory if the number of bacteria in all sample units does not exceed m,  
M=maximum value for the number of bacteria – the result considered unsatisfactory if the number of bacteria in one or more sample units is M or more,  
c=number of sample units the bacteria count of the other sample units is m or less.
7. The pet food described above was not produced from :
  - a. animals kept for agricultural production, which died but were not slaughtered, including stillborn and unborn animals and farm animals that have died in transit, with exception of instances of emergency slaughtering for reasons of welfare;
  - b. animals which were killed in the context of disease control measures either on the farm or in any other place designated by the competent authority;
  - c. animal by-products including blood originating from animals which showed, during veterinary ante-mortem inspection carried out at the time of slaughtering, clinical signs of disease communicable to man or other animals;
  - d. those parts of animals slaughtered in the normal way which were not presented for post mortem inspection, with the exception of hides, skins, hooves, feathers, wool, horn, blood and similar products;
  - e. meat, poultry meat, fish, game and foodstuffs of animal origin which were spoiled;
  - f. animal by-products containing residues of substances which posed a danger to human or animal health;
  - g. fish or offal from fish which was excluded from human consumption because of clinical signs of an infectious disease;
  - h. processed animal protein derived from high risk material:
8. The pet food described above has undergone all precautions to avoid recontamination with pathogenic agents after treatment and/or processing.
9. The pet food described above was packed in new packaging material.
10. The processing / manufacturing plant of pet food is located outside a 25km radius of areas with restrictive measures concerning notifiable Avian Influenza.
11. Packing is in sealed containers only.
