Veterinary certificate for the exportation of bovine semen to Israel

Part I: Details of dispatched consignment	I.1. Consignor: Name: Address:		I.2. Certificate reference number*:			
			I.3. a. Central competent authority: Federal Food Safety and Veterinary Office FSVO			
			I.3. b. Cantonal competent authority:			
	I.4. Consignee Name: Address:					
	I.5. Country of origin: Switzerland ISO Code: CH			I.6. Country of destination: ISO Code:		
	I.7. Place of origin: Name: Address:			I.8. Place of loading:		
	I.9. Means of transport (if available): Aeroplane <input type="checkbox"/> Ship <input type="checkbox"/> Railway wagon <input type="checkbox"/> Road vehicle <input type="checkbox"/> Other <input type="checkbox"/>			I.10. Temperature of product: Ambient <input type="checkbox"/> Chilled <input type="checkbox"/> Frozen <input type="checkbox"/>		
				I.11. Identification of container / seal number:		
	I.12. Commodities intended for use as: Breeding / Rearing <input type="checkbox"/> Wildlife management <input type="checkbox"/> Other <input type="checkbox"/>			I.13. Total number of packages:		I.14. Nature of Commodity (HS code) :
	I.15. Identification of commodities ²⁾ :					
Species (scientific name):	Breed:	Identification mark:	Date of birth:	Quantity:	Collection date:	Approval .No. center of origin:

1) If necessary, extra tables can be attached as annex by the consignor and should be approved and stamped by the cantonal competent authority.

Switzerland	Bovine semen
II. Sanitary information	Certificate reference number*:
Part II: Sanitary information	<p>I, the undersigned official veterinarian, hereby certify:</p> <p>A. that the frozen semen, specified below, was derived from an Artificial Insemination Center authorized by the competent authority:</p> <ol style="list-style-type: none"> 1. Which is under permanent official veterinary supervision; 2. Which is situated in an area of 30 kilometers in diameter, where Foot and Mouth Disease and Vesicular Stomatitis have not occurred during the last six months; 3. Where no cases of Trichomoniasis and Campylobacteriosis were diagnosed in the last 5 years. 4. The bulls originate from herds, where there were no evidence, clinical cases, or laboratory findings, of paratuberculosis in the last 3 years² or the donor bulls were tested serologically negative for paratuberculosis before semen collection. 5. Where all the bulls of the Center have been free, for the last twelve months, of Tuberculosis, Brucellosis, Leptospirosis, and Leucosis. 6. Which at the time of collection has been an IBR/IPV free herd – all the bulls in it have been serologically tested every 12 months for IBR/IPV with negative results²; or – the donor bulls were held in isolation during the period of collection and for the 30 days following collection and were subjected to a diagnostic test for IBR/IPV on a blood sample taken at least 21 days after collection of the semen, with negative results. <p>B. that the frozen semen, specified below, was derived from bulls:</p> <ol style="list-style-type: none"> 1. Which have never been used for natural service. 2. Which have passed, within 12 months of the date of collection of the semen a negative tuberculin test and avian tuberculin test; 3. Which have passed, within six months before the date of the collection of the semen, a negative serological test for Leptospirosis (<i>L. Pomona</i>, <i>L. grippityphosa</i> and <i>L. hardjo</i>, at 1:100 dilution); 4. For Leucosis which comply with the standards laid down in the Regulation 2016/429 and updating legislation. 5. Which are considered free of Trichomoniasis and Campylobacteriosis based upon tests for qualification of entry into the Center and later, at one year interval, as routine tests; 6. For Brucellosis which complies with the standards laid down in the Regulation 2016/429 and updating legislation. 7. Which are free from B.V.D. virus. 8. <input type="checkbox"/> Were kept in a EHD free country or zone¹⁾, specify _____, for at least 60 days before commencement of, and during, collection of the semen²⁾ <i>Or</i> <input type="checkbox"/> subjected to a serological test¹⁾ to detect antibody to EHD, with negative results, at least every 60 days throughout the collection period and between 21 and 60 days after the final collection for this consignment²⁾; <i>Or</i> <input type="checkbox"/> were subjected to an agent identification test¹⁾ to detect antibody to EHD on blood samples collected at commencement and conclusion of, and at least every 7 days (virus isolation test) or at least every 28 days (PCR test) during, semen collection for this consignment, with negative results²⁾. 9. <input type="checkbox"/> Were kept in a BTV free country or zone¹⁾, specify _____, for at least 60 days before commencement of, and during, collection of the semen²⁾ <i>Or</i> <input type="checkbox"/> subjected to a serological test¹⁾ to detect antibody to the BTV group, with negative results, at least every 60 days throughout the collection period and between 21 and 60 days after the final collection for this consignment²⁾; <i>Or</i> <input type="checkbox"/> were subjected to an agent identification test¹⁾ to detect antibody to the BTV group on blood samples collected at commencement and conclusion of, and at least every 7 days (virus isolation test) or at least every 28 days (PCR test) during, semen collection for this consignment, with negative results²⁾. <p>C. The <u>semen to be exported</u> to Israel</p> <ol style="list-style-type: none"> 1. contains 1 mg of Streptomycine or 1 million I.U. of Penicillin in each 100 cc of diluent, or a similar antibiotic (specify name and concentration): _____ 2. was kept separately from any other semen between its collection and its shipment. 3. was packed in separate portions so that separate ejaculations can be easily identified;

¹⁾ As in the OIE Terrestrial Animal Health Code
