### Veterinary certificate for the exportation of bovine semen from Switzerland to Qatar

<b>Part I: Details of dispatched consignment</b>	I.1. Consignor: Name: Address:  Tel:		I.2. Certificate reference number*:			
			I.3. a. Central competent authority: <b>Federal Food Safety and Veterinary Office FSVO</b>			
			I.3. b. Cantonal competent authority:			
	I.4. Consignee Name: Address:					
	I.5. Country of origin: <b>Switzerland</b> ISO Code: <b>CH</b>		I.6. Country of destination: <b>Qatar</b> ISO Code: <b>QA</b>			
	I.7. Place of origin: Name: Address:  Approval number of establishment(s) <sup>1)</sup> :		I.8. Place of loading:			
			I.9. Expected border post <sup>1)</sup> :			
	I.10. Means of transport (if available): Aeroplane <input type="checkbox"/> Ship <input type="checkbox"/> Railway wagon <input type="checkbox"/> Road vehicle <input type="checkbox"/> Other <input type="checkbox"/> Identification <sup>1)</sup> :		I.11. Temperature of product: Ambient <input type="checkbox"/> Chilled <input type="checkbox"/> Frozen <input type="checkbox"/>			
			I.12. Identification of container/seal number <sup>1)</sup> :			
	I.13. Commodities intended for use as: Breeding/rearing <input type="checkbox"/> Wildlife management <input type="checkbox"/> Other <input type="checkbox"/>			I.14. Total number of packages:		
	I.15. Identification of commodities <sup>2)</sup> :					
	Name	Breed	Ear-tag no.	Date of birth	Number of straws	Date of collection

1) If applicable

2) If necessary, extra tables can be attached as annex by the consignor and should be approved and stamped by the cantonal competent authority.

Switzerland		Bovine Semen
<b>II. Sanitary information</b>		Certificate reference number*:
<b>Part II: Sanitary information</b>	The undersigned official veterinarian confirms that:	
	1) Switzerland, the country of origin of the donor bulls is free from FOOT and MOUTH DISEASE, RINDERPEST, RIFT VALLEY FEVER, CONTAGIOUS BOVINE PLEUROPNEUMONIA, BOVINE TUBERCULOSIS, BOVINE BRUCELLOSIS, BOVINE LEUCOSIS and IBR/IPV	
	2) The semen collection centre where the semen has been produced is officially approved and under the supervision of an official veterinarian from the cantonal veterinary authority in accordance with the conditions laid down in chapter 4.6 and 4.7 of the terrestrial code of the OIE and with the Swiss health directives and is free from restriction due to officially controlled infectious or contagious diseases of cattle.	
	3) At the time of semen collection, the donor bulls did not show clinical signs of infectious diseases including bovine genital trichomoniasis, bovine genital campylobacteriosis, bovine virus diarrhea, bluetongue, brucellosis, contagious bovine pleuropneumonia, leptospirosis, bovine leucosis, malignant catarrhal fever (exotic form), paratuberculosis, Q-fever and tuberculosis and the bull has not been used for natural mating since entering the centre.	
	4) a) All bulls of the semen collection centre were tested and examined, according to article 4.7.2 of the Terrestrial Code of the OIE for the following diseases	
	Bovine brucellosis	<input type="checkbox"/> Complement fixation test or <input type="checkbox"/> ELISA or <input type="checkbox"/> Rose Bengal test
	Bovine tuberculosis	Intradermal tuberculin test with bovine tuberculin PPD
	Infectious bovine rhinotracheitis	<input type="checkbox"/> Serum neutralisation test or <input type="checkbox"/> ELISA
	Enzootic bovine leucosis	<input type="checkbox"/> Agar gel immunodiffusion or <input type="checkbox"/> ELISA of the serum
	Bovine genital trichomoniasis	<input type="checkbox"/> Microscopic examination of the culture of preputial washing or <input type="checkbox"/> PCR testing of preputial washings
Bovine genital campylobacteriosis	<input type="checkbox"/> Microscopic examination of the culture of preputial washing or <input type="checkbox"/> Immunofluorescent antibody test or PCR testing of preputial washings	
Bovine virus diarrhea	Virus isolation test or a test for virus antigen, with negative results and Serological test to determine the serological status of every animal	
Leptospirosis	Microscopic agglutination test or antibiotic treatment	
All the tests were performed at an approved laboratory.		
4) b) The semen in this consignment was collected from donor bulls, that have been subjected to the tests according to point 4 a) within six (6) months before the date of the collection of the semen to be exported, with negative results.		
5) Bluetongue Disease		
The semen was obtained from donor bull(s) which comply with at least one of the following conditions:		
<input type="checkbox"/> i they have been kept outside a BTV restricted zone for a period of at least 60 days before commencement of, and during, collection of the semen;		
<input type="checkbox"/> ii. they have been subjected to a serological test according to the OIE Terrestrial Manual to detect anti-bodies to the BTV group, with negative results, at least every 60 days during the collection period and between 21 and 60 days following the final collection for this consignment;		

\* Indicated by the cantonal competent authority.

<b>Switzerland</b>	<b>Bovine Semen</b>
<b>II. Sanitary information</b>	Certificate reference number*:
<p><input type="checkbox"/> iii. they have been subjected, with negative results, to an agent identification test for BTV according to the OIE Terrestrial Manual carried out on blood samples collected:</p> <p>(a) at commencement and final collection; and</p> <p>(b) during the period of semen collection for this consignment:</p> <p style="padding-left: 40px;"><input type="checkbox"/> i. at least every seven days, in the case of a virus isolation test,</p> <p style="padding-left: 40px;">or <input type="checkbox"/> ii. at least every 28 days, in the case of a polymerase chain reaction (PCR) test.</p> <p>6) The semen is collected, processed and handled according to the recommendations and guidelines of the OIE and found free from diseases.</p> <p>7) The container(s) for transportation of semen are either new or have been disinfected with an approved disinfectant before being used. The tank was sealed by a veterinarian officially authorized, using an official seal.</p>
