Veterinary certificate for the exportation of Bovine semen from Switzerland to Namibia

Part I: Details of dispatched consignment	I.1. Consignor Name:		I.2. Certificate reference number*:	
	Address:		I.3. a. Central competent authority: Federal Food Safety and Veterinary Office FSVO	
			I.3. b. Cantonal competent authority:	
	I.4. Consignee Name: Address:			
	I.5. Country of origin: Switzerland ISO Code: CH		I.6. Country of destination: Namibia ISO Code: NA	
	I.7. Place of origin: Semen collection centre: Name: Address: Approval number of establishments:			
	I.8. Place of shipment:		I.9. Date of departure:	
	I.10. Means of transport: Aeroplane <input type="checkbox"/> Ship <input type="checkbox"/> Railway wagon <input type="checkbox"/> Road vehicle <input type="checkbox"/> Other <input type="checkbox"/> Identification:		I.11. Expected entry border post: I.12. Description of commodity:	
	I.13. Total quantity:		I.14. Total number of packages:	
	I.15. Temperature of the product: Ambient <input type="checkbox"/> Chilled <input type="checkbox"/> Frozen <input type="checkbox"/>		I.16. Commodity code (HS code):	
	I.17. Identification of container/seal number:		I.18. Type of packaging:	
	I.19. Commodities intended for use as for: Technical use <input type="checkbox"/> Further processing <input type="checkbox"/> Other <input type="checkbox"/>			
	I.20. Identification of commodities ¹⁾ :			
	Donor identity (number and name):	Breed:	Date of collection:	Total quantity of straws:

1) If necessary, extra tables can be attached as annex by the consignor and should be approved and stamped by the Cantonal Competent Authority.

* Indicated by the Cantonal competent authority.

Swiss approved form No. O-2020-03

Switzerland		Bovine semen	
II. Zoosanitary information		I.2. Certificate reference number*:	
Part II: Zoosanitary information	I, the undersigning official veterinarian, hereby certify that the following conditions have been fulfilled in connection with the bovine semen to be exported to Namibia under cover of the permit No:		
	<ol style="list-style-type: none"> 1. The semen referred above was collected at an insemination centre, which is under the control and supervision of a veterinarian approved by the Veterinary Authority of the exporting country, to ensure that the standards as recommended in the OIE International Animal Health Code are fulfilled. 2. No outbreaks of Foot and Mouth Disease or Vesicular Stomatitis have occurred at, or within twenty (20) kilometres of the said insemination station during the twelve (12) months immediately preceding the date on which the semen for export was collected. 3. The animals on the insemination station have not been vaccinated against Food-and Mouth Disease within the three (3) months preceding the date of the collection of the semen. 4. The donor bulls – (also refer to note) <ol style="list-style-type: none"> 4.1 Had been continuously resident at the AI centre concerned or at other such approved A.I. centre for a period of at least three (3) months prior to collection of the semen for export to NAMIBIA and during that, time had not been used for natural mating. 4.2 Were healthy and clinically free from diseases which are transmitted via the semen and including Listerioses, Bovine Viral Diarrhoea/Mucosal Disease, Johne's Disease, Infectious Bovine Rhinotracheitis/Infectious Pustular Vulvo-vaginitis, Enzootic Bovine Leucosis and pyrogenic infections; 4.3 Had been tested for tuberculosis with negative results within the twelve (12) months preceding the collection of the semen to be exported OR Switzerland is free from bovine tuberculosis 4.4 Showed no Trichomonas foetus infection on both direct microscopic examination and culture on one sheath-washing taken from them during the three (3) months immediately preceding the date of collection; 4.5 Showed no Campylobacter foetus infection either by immunofluorescence means or on cultural examination on one sheath-washing taken from them during the three (3) months immediately preceding the date of collection; 4.6 Had been tested with negative results for Leptospirosis serotypes prevalent in cattle in the exporting country within three (3) months preceding the day of collection OR were injected twice with 25 mg dihydrostreptomycin per kg of live body weight; the first injection being given 14 days prior to collection and the second on the day of collection 4.7 Were tested for Brucellosis with negative results within the three (3) months preceding the collection of this semen 4.8 Have been tested for Johne's Disease with negative results within the 12 months preceding collection a no clinical, cultural or pathological evidence of Johne's Disease occurred within the AI centre in the previous 3 years. <p>NOTE - In case of bulls continuously resident at the AI Centre concerned for longer periods than three months, prior testing will be acceptable provided the tests were performed at the AI centre during this period of residence and not more than twelve months prior to the collection of the semen to be exported</p> <ol style="list-style-type: none"> 5. The semen <ol style="list-style-type: none"> 5.1 was collected in such a manner to avoid contamination with potentially pathogenic bacteria and representative samples tested for contamination using standardised methods 5.2 straws were sealed and code marked in accordance with International standards of the International Committee for Animal Recording (ICAR) 5.3 Was preserved with(name of antibiotics and concentration) 6. BSE is compulsory notifiable in accordance with OIE standards 7. The consignment was adequately secured and hygienically packed in cleaned and disinfected containers and the containers sealed under official supervision.
