Veterinary health certificate for the exportation of bovine semen to the United Arab Emirates

Part I: Details of dispatched consignment	I.1. Consignor Name:		I.2. Certificate reference number*:			
	Address:		I.3. a. Central competent authority: Federal Food Safety and Veterinary Office FSVO Schwarzenburgstrasse 155, 3003 Bern, Switzerland			
	Tel:		I.3. b. Cantonal competent authority:			
	I.4. Consignee Name:		I.5. Country of origin: Switzerland ISO Code: CH			
	Address:		I.6. Country of destination: United Arab Emirates ISO Code: AE			
	I.7. Place of origin:		I.8. Place of destination:			
	Semen Collection Centre: Name:		I.9. Means of transport*: Aeroplane <input type="checkbox"/>			
	Address:		Ship <input type="checkbox"/>			
	Centre approval number:		Railway wagon <input type="checkbox"/>			
			Road vehicle <input type="checkbox"/>			
			Other <input type="checkbox"/>			
			Identification:			
	I.10. Place of sealing and loading:		I.12. Commodity code (HS code):			
	I.11. Description of commodity:					
	I.13. Number of container / seal number:		I.14. Total number of straws in consignment:			
	I.15. Temperature of the product: Ambient <input type="checkbox"/> Chilled <input type="checkbox"/> Frozen <input type="checkbox"/>					
	I.16. Commodities intended for use as: Breeding / rearing <input type="checkbox"/>					
I.17. Straw identification ¹⁾ :						
Name of donor:	Registration number:	Breed:	Date of birth:	Collection date:	Number of straws:	

1) If necessary, extra tables can be attached as annex by the consignor and should be approved and stamped by the Cantonal Competent Authority.

Switzerland		Bovine Semen																	
II. Health attestation		I.2. Certificate reference number*:																	
Part II: Zoosanitary information	<p>I, the undersigned official veterinarian, duly authorized by the Government of Switzerland, do hereby certify that:</p> <p>II.1. The semen was collected from a bull maintained in an artificial insemination centre which is under official veterinary control and approved for collection of semen for export in accordance with the provisions specified in EU Directive 88/407/EEC.</p> <p>II.2. The semen was collected in full compliance with Commission Regulation (EC) No 1266/2007 as amended.</p> <p>II.3. The semen was collected, processed and stored in accordance with Chapters 4.5. and 4.6. of OIE Terrestrial Code.</p> <p>II.4. At the time of the collection of the semen, the donor bull was healthy and free of evidence of disease.</p> <p>II.5. SWITZERLAND, has been free from foot and mouth disease, epizootic haemorrhagic disease, rinderpest, contagious bovine pleuropneumonia, vesicular stomatitis, lumpy skin disease and peste of the small ruminants for the twelve (12) months immediately preceding the collection of the exported semen.</p> <p>II.6. All the animals maintained at the artificial semen collection centre, including the donor bull, are recognized to be free of tuberculosis, brucellosis, leptospirosis, paratuberculosis, bluetongue, epizootic hemorrhagic disease, enzootic bovine leucosis, campylobacteriosis and trichomoniasis.</p> <p>II.7.</p> <p><input type="checkbox"/> [Animal originates from zones where no bluetongue disease has been detected for at least 12 months prior to collection.] OR</p> <p><input type="checkbox"/> [The animal showed no clinical sign of bluetongue on the day of collection AND;</p> <p><input type="checkbox"/> i. were kept in a vector-protected establishment for at least 60 days before commencement of, and during, collection of the semen; OR</p> <p><input type="checkbox"/> ii. were subjected to a serological test to detect antibodies to the BTV group, with negative results, at least every 60 days throughout the collection period and between 28 and 60 days after the final collection for this consignment; OR</p> <p><input type="checkbox"/> iii. were subjected to an agent identification test on blood samples collected at commencement and conclusion of, and at least every 7 days (virus isolation test) or at least every 28 days (PCR test) during, semen collection for this consignment, with negative results.]</p> <p>II.8. Before entering the semen production centre all the bulls underwent an quarantine isolation period and fulfilled the conditions laid down in Annex B, Chapter I of Council Directive 88/407/EEC</p> <p>II.9. The donor bull has been subjected to the following test with negative result:</p> <table border="1" data-bbox="327 1064 1412 1512"> <tbody> <tr> <td>a) Tuberculosis</td> <td>Intradermal test</td> </tr> <tr> <td>b) Brucellosis</td> <td>Serological test</td> </tr> <tr> <td>c) Leptospirosis</td> <td>Microtiter agglutination-lysis test</td> </tr> <tr> <td>d) Paratuberculosis</td> <td>ELISA or complement fixation test</td> </tr> <tr> <td>e) Enzootic Bovine Leucosis</td> <td>Agar gel immunodiffusion or ELISA</td> </tr> <tr> <td>f) Infectious bovine rhinotracheitis</td> <td>Serum neutralisation test or ELISA</td> </tr> <tr> <td>g) Campylobacter fetus</td> <td>Culture of preputial cavity washings</td> </tr> <tr> <td>h) Trichomonas fetus</td> <td>Microscopic examination and culture of preputial cavity washings</td> </tr> </tbody> </table>			a) Tuberculosis	Intradermal test	b) Brucellosis	Serological test	c) Leptospirosis	Microtiter agglutination-lysis test	d) Paratuberculosis	ELISA or complement fixation test	e) Enzootic Bovine Leucosis	Agar gel immunodiffusion or ELISA	f) Infectious bovine rhinotracheitis	Serum neutralisation test or ELISA	g) Campylobacter fetus	Culture of preputial cavity washings	h) Trichomonas fetus	Microscopic examination and culture of preputial cavity washings
	a) Tuberculosis	Intradermal test																	
b) Brucellosis	Serological test																		
c) Leptospirosis	Microtiter agglutination-lysis test																		
d) Paratuberculosis	ELISA or complement fixation test																		
e) Enzootic Bovine Leucosis	Agar gel immunodiffusion or ELISA																		
f) Infectious bovine rhinotracheitis	Serum neutralisation test or ELISA																		
g) Campylobacter fetus	Culture of preputial cavity washings																		
h) Trichomonas fetus	Microscopic examination and culture of preputial cavity washings
