

## e-tierversuche: Notes for release 3.9.0 (October 2017)

Process	Process name	Mantis Id	Description	Category	Target persons
P3	Animal husbandry authorization	1272	Screen actualization: when changing the address of an animal husbandry, the correct company appears after first saving	*	Canton
P4	Invalidating phenotypes authorization	1265	If all documents of an announcement have been deleted, the <delete button> appears for the respective announcement right after actualization	*	Canton, institute
P5	Controls	1255	CO ZH: The chapter "Controls" opens up	*	Canton
P6	Reports	1253	LAWOs of big institutes can search reports without provoking server error	*	Institute
P6	Reports	1236	FVO delegated reports: reports are correctly shown when searched by various status and no server error is provoked when searched by specific cantons	*	FSVO
P6	Reports	1181	Discrepancy of status in report listings: delegated FVO report listing shows all reports in status OPEN	*	FSVO
P6	Reports	1164	Delegated reports: search of reports in status OPEN or ALL works for the roles CO and FVO	*	Canton, FSVO
P6	Reports	1274	Inter-cantonal reports with many involved cantons: necessity of user-friendliness and practical display	*	Institute, canton, FSVO
P6	Reports	1277	Trimestrial statistic CSV exports: modified to allow a follow up on newly delivered data	+	BLV
P1 / P6	Authorization animal experiment & reports	1225	Termination of an expired application is not possible anymore as it caused unnecessary additional reports	-	Institute, canton, FSVO
P1	Authorization animal experiment	1223	SC applications frequently provoke server error and thus error tracking (logs) has been improved for analysis	+	Institute, canton, FSVO
P1/P2	Authorization animal experiment	1099	Role commission member: the menu within an application is shown correctly no matter which menu item the user is clicking on	*	Commission

Process	Process name	Mantis Id	Description	Category	Target persons
GP	General processes	1245	Adhoc reporting for CCM: Parameters for reports work properly (clicking on animal number used to throw an error message)	*	Commission
GP	General processes	1170	The name of the cantonal collaborator who created an authorization appears on the form B and not «deleted person 0»	*	Institute, canton
GP	General processes	1166	When the canton is changing an SC into an R, data about when and by whom (institute) the documents have been uploaded is remaining (traceability warranted)	*	Institute, canton
GP	General processes	1264	Documents still open up when the respective application is changed from an N/R application to an SC	*	Institute, canton
GP	General processes	1275	Within SC applications, documents from parent application or newly added documents remain available and do not disappear anymore	*	Institute, canton

+ = new function

\* = bug correction

- = function removed
